

SUMMARY

I am a web developer formally trained in design. I love making web applications with the user in mind. I see UX as a form of storytelling, beginning with easy to use functionality, enhancing that experience through its visual design, then growing into an app with use and purpose. I'm always ready to discover new and different ways to tackle a problem and love learning new technologies that help me grow as a developer.

SKILLS

Front End: **CSS, Javascript, JQuery, AJAX, HTML, Bootstrap**

Back End: **Ruby, Rails, Sinatra, Active Record**

Databases: **PostgreSQL, SQLite**

Testing: **Rspec, CircleCI, SimpleCov, Jasmin, Capybara**

PROJECTS

There's a Board github.com/jeder28/theres-a-board

Core Developer of There's a Board, an internal app to encourage and aid Dev Bootcamp students to tutor and study by scheduling their time, providing goals to tutor a number of times and promote friendly competition between students on the number of times they tutored.

- Implemented the jQuery plugin fullCalendar to neatly display scheduling information to our users.
- Built our own front-end using Javascript to allow users to interact with our site.
- Built the back-end using Rails and the Rails API to create and update appointments.
- Used Bootstrap theme for a clean and unified style throughout the site.
- Deployed using Heroku

Stack Overphil stack-overphil.herokuapp.com

Created a mini-version of Stack Overflow that allowed our users to ask questions, answer questions, decide which answer to their own question was the best and vote on any question, answer or comment. We were then able to then sort this information by popularity, recently posted or by tags.

- Back-end was built using Rails, to create questions, answers and comments and their corresponding relationships.
 - We implemented AJAX for quick filtering and searching for questions.
 - I used plain CSS for the styling of the site
-

EXPERIENCE

Dev Bootcamp Sept. 2015

Cleveland Institute of Art 2009

Bachelor of Fine Arts

Majoring in Digital Art

OTHER INTERESTS

In my free time I enjoy cooking and improving my chicken pot pie recipe, playing strategy games like Civilization, diy projects and anything crafty. I love animals, I have one giant cat and one tiny dog who get along quite well. For almost a year on monday evenings I've been learning how to tango, it is a hard dance to learn, but so much fun and hopefully I will be demonstrating my skills in a student showcase soon!
